

1. FUJI ELECTRIC INDUSTRIES CO., LTD.

looking for
BUYER/SUPPLIER

1. Line of Business / Production Items

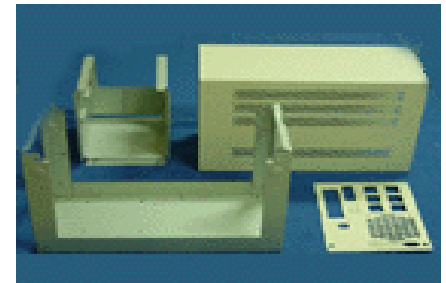

Heatsink

Heatsink

Aluminum die cast

Sheet metal

Main Products: Metal products, electronic parts, and equipment products

Main Technology: Doing business with many Japanese companies

Main Customer (Industry): Electric industry (industrial equipment, consumer equipment, and new energy equipment)

2. We are looking for...

BUYER

Electronic parts (power-supply IC), processed metal products (heatsink, sheet metal, and aluminum die cast), coil, relay, arrester, and heat resistant paint (materials)

【Target】 Local Japanese companies that purchase electronic parts and equipment products;
Vietnamese companies that manufacture products for Japanese companies

SUPPLIER

Heatsink, sheet metal, aluminum die cast products, electronic parts, plastic resin molded products, and large reactor

【Target】 Local companies (manufacturer of heatsink, sheet metal, aluminum die cast, and electronic parts)

< Description of the processing desired for each product >

- **Heatsink:** Customizable extrusion type (extrusion width of approx. 50 cm max.), compatible with anodic oxide coating
- **Sheet metal:** Product frame size of approx. 60 x 60 cm max. (press, deep drawing[desired oil pressure of 300T or more], welding, assembly and machining), integrated coating system desired.
- **Aluminum die cast:** Casting of 3000t.
Manufacturers that can deal with powder coating and anodic oxide coating processes are desired.
- Manufacturers of plastic resin molded products and large reactor

< Manufacturer that can deal with not only the processing described above but also the following requests >

- Manufacturers that can take flexible measures for the quality assurance that Japanese companies require
- Measure for environmental reference materials (essential)
- Flexible measures can be taken for due dates.
- With experience with Japanese companies
- Use of Japanese (desired)
- Measures can be taken for analytical investigation and reporting of defective products (in English or Japanese).

2. FUJI SEIMITSU KOGYO CO., LTD.

looking for
BUYER

1. Line of Business / Production Items

Electronic parts; Metal mask

Radiator core guard for motorcycle

Sensor parts

Nameplate, Emblem

Photo Etched and Electroformed Products

We can process hard material without strain and burr; even silicon steel sheet with insulation films on the surface can be etched into the requested shape with the accuracy of micron level in a short lead time, without using expensive stamping tools.

As we can meet various needs from prototype to full production up to millions, our products are widely used in Semiconductor, Electronics, Medical devices, Automotive parts, and Machine tools, etc.

Main Products: Precision metallic work, Electronic Parts, Optical sensor parts and metal masks for vapor deposition, Radiator Core Guard for motorcycle

Main Technology: Photo Etching and Electroforming Process, Precision Sheet Metal Working, Printing, and Plating

Main Customer (industry): Automotive, Medical, Biotechnology, Sensor, Universities, Research Institutions, etc.

2. We are looking for...

BUYER

Precision Processed Thin Plate Products with Photo Etching Technology ($t < 1.0\text{mm}$)

【Target】 Manufacturers of home electronic appliances, car parts, medical biotechnology, optical equipment, and companies that develop organic EL devices, etc.

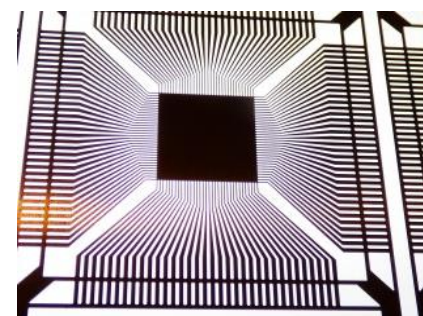

3. Company Profile & Contact Information

3. NAKA SEIKI CO., LTD.

looking for
BUYER/PARTNERSHIP

1. Line of Business / Production Items

Hand press

Impact press

Precision air chuck

Precision air chuck
(Example of special products supported)

Main Products: (1) Hand press, Impact press (2) Precision air chuck

Main Customer (Industry): Automobile, light electrical appliance, general electrical machinery, and FA automatic machine manufacturer

[Hand Press]

Abundant line-up of small and light-weighted products, which are selectable according to use applications.

Highly precise and excellent in rigidity through precision processing. Simple structure realizes maintenance-free state.

- Rack and pinion type hand press: Installation of rack gear on the spindle side and pinion gear on the handle side produces a stable thrust force over the entire stroke (thrust force of 1.6 kN to 6.0 kN).

- Toggle type hand press: Adoption of a toggle link mechanism generates a large force at a position where the link has fully been extended (thrust force of 5.0 kN to 22.0 kN).

<Use applications> Light press-fitting of bearing, press-fitting of small-diameter pin and shaft, drilling of plate materials, bend correction of shaft and pipe, caulking, etc.

[Precision Air Chuck]

Small air chuck with high precision, high rigidity and high gripping force, available for workpieces in grinding, lathe, machining, deflection measurement, etc.

Selectable from wide range of product structures according to your workpiece conditions.

Consistently worked from design to manufacture, we can accept individual orders according to requests, including molded pawls tailored to workpieces.

- Use of special materials and assembly by craftsmen making fine adjustments by comparison achieve high fitting precision and repeat precision.

- The highest repeat precision of an air chuck unit is 0.002mm.

Simultaneous finishing processing of molded pawl and chuck body can accomplish the swing precision of 0.01 to 0.03mm in the master workpiece standard.

- Centering can be performed only by gripping a workpiece because the centripetal is high.

- Manufacturing small air chucks whose outside diameter is $\phi 25$ to $\phi 100$ mm is our strong point. However, air chucks of up to $\phi 250$ were manufactured according to customers' requests.

- Fabricable when the number of pawls is 2, 3, or 4, and the pawl stroke is $\phi 1$ - $\phi 10$ mm (actual record of up to $\phi 32$ mm).

<Use applications> Grinding, lathe, machining, deflection measuring instrument, etc.

2. We are looking for...

BUYER

(1) Hand press, Impact press (2) Precision air chuck

【TARGET】

[Hand press] Low voltage, electrical machinery, and transportation equipment manufacturers, and companies that assemble parts in the field; or, companies that manufacture FA equipment machines

[Precision air chuck] Companies that perform metal cutting work or manufacture FA equipment machines

PARTNERSHIP

(1) Hand press, Impact press (2) Precision air chuck

【TARGET】

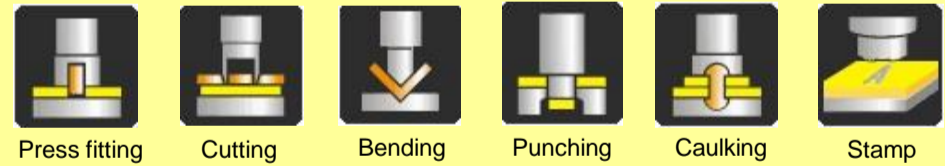

Sales agents that can sell our products (hand press, impact press, precision air chuck)

3. Company Profile & Contact Information

4. NAKAUMI INDUSTRIES CO., LTD. NAKAUMI VIETNAM CO., LTD. VN

looking for
BUYER/SUPPLIER/PARTNERSHIP

1. Line of Business / Production Items

Threaded Bolt

Processing Bolt

Insertion

Nut, Washer

Japanese quality is provided at a Vietnam price!

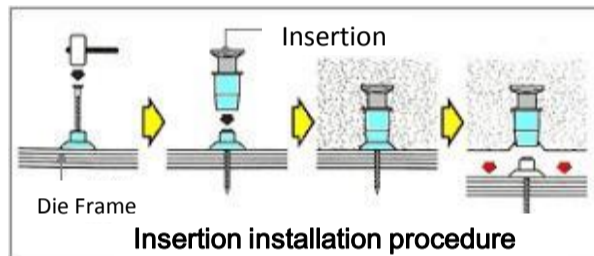

Main Products: Continuous thread stud, insertion, and planned articles (special screw and parts of processing, size, or steel product according to customers' requests)

Main Technology: This term is the 58th year of the company established as a professional full-threads manufacturer.

We well exploit our labor efficiency know-how gained through our long experiences at our Vietnamese plant as well, and have realized Japanese quality and globally competitive prices at the same time.

Main Customer (Industry): Manufacturing industry (Japanese sub-contract, Vietnam local sub-contract)

Insertion operation example

2. We are looking for...

BUYER

Continuous thread stud, insertion, and planned articles (special screw and parts of processing, size, or steel product according to customers' requests)

【Target】 Overseas screw buyers (Europe, U.S., Middle East, and Vietnamese local subcontractors)

SUPPLIER

Iron/stainless steel wire materials

【Target】 Material manufacturers(SS, SUS), wire trading companies, and wire drawing suppliers

PARTNERSHIP

Plating **【Target】** Plating suppliers

5. NAKAYAMA MITSUBOSHI STEEL PRODUCTS, LTD.

looking for
BUYER/SUPPLIER/PARTNERSHIP

1. Line of Business / Production Items

Want to Sell...

(Above) Light gauge steel, electric resistance welded steel pipe,
(Below) "Ecostar(R)", Light-gauge steel processing

Want to Buy...

(From left to right)
Anchor bolts, annealed iron wire, wire nails, round/screw nails, etc.

If you are a user that wants to sell high quality, high strength and lightweight members, and are required to produce automation processes smoothly...
or a manufacturer that desires to enhance your productivity, yield, and manufacturing management...

Why don't you make a business partnership with us?

We are also looking for manufacturers of anchor bolts, annealed iron wire, wire nails, and special nail products!

Main Products: Light gauge steel, electric resistance welded steel pipe, "Ecostar(R)", Light-gauge steel processing

2. We are looking for...

BUYER

Lip channel steel, light-gauge channel steel, square steel tubes for general structural purpose, and carbon steel tubes for general structural purpose

【Target】 Construction steel processing user and forming manufacturer

SUPPLIER

Wire secondary product and architectural hardware (cast iron/barbed wire, anchor bolts, round/screw/floor/color/stainless/concrete nails)

【Target】 Wire secondary product processing manufacturer and architectural hardware processing manufacturer

■Example■

(1) Anchor bolts:

Anchor bolt product manufacturers are needed. Products of good quality are desired to be purchased at reasonable prices. Acquisition of Z mark is required. Sold throughout Japan.

(2) Annealed iron wire:

Annealed product manufacturers are needed. Products of good quality are desired to be purchased at reasonable prices. Acquisition of the JIS standard is required. Sold throughout Japan. Cooperation will also be provided for the acquisition of the JIS mark.

(3) Wire nails, screw nails, floor nails, color nails, lawn stop large-head nails, stainless steel nails, and concrete nails:

Wire nails and special nails product manufacturers are needed. Products of good quality are desired to be purchased at reasonable prices. Wire nails alone are also acceptable. Acquisition of the JIS standard is required. Sold throughout Japan. Cooperation will also be provided for the acquisition of the JIS mark.

PARTNERSHIP

Forming products (providing high quality, high yield, and thorough manufacturing management)

【Target】 Forming manufacturer, etc. (a partnership is desired to be established for the high quality, high yield, and thorough manufacturing management)

3. Company Profile & Contact Information

(NAKAYAMA MITSUBOSHI STEEL PRODUCTS, LTD./Japan Head Office)

- Established Year : 1949

6. NIHON FLASH CO., LTD.

looking for
BUYER

1. Line of Business / Production Items

CD Stud Welding Machine
FS-1000

CD Weld Gun

CD Weld Studs

CD Weld Tapped Pads

CD stud welding is a process method by which any one can easily weld screws on metallic plate vertically. Since no burn appears on the back side, and the appearance is not spoiled, it is frequently used for sheet metal in the precision sheet metal industry, etc. Our CD stud welder has gained the No.1 market share in Japan from the viewpoints of weldability, durability and price!

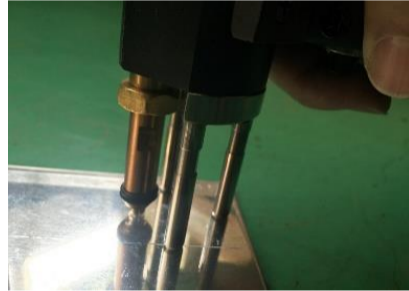

Main Products: CD Stud Welding Machine, CD stud bolt, clinching fasteners

Main Customer (Industry): Boiler tube installation industries such as distribution board, vending machine, ATM, medical equipment, fire engine, incinerator and paper mill, etc.

CD stud welding method: Welding is completed through only three steps; (1)Set CD weld gun in the CD stud welding machine, (2)Press CD weld gun at a position at which welding is to be performed, and (3) Press the switch.

〈Step 1〉 Set CD weld gun in the CD stud welding machine...

〈Step 2〉 Press CD weld gun at a position at which welding is to be performed...

〈Step 3〉 Welding is completed.

2. We are looking for...

BUYER

Fastener products with a focus on CD stud welder and CD stud bolts

【Target】

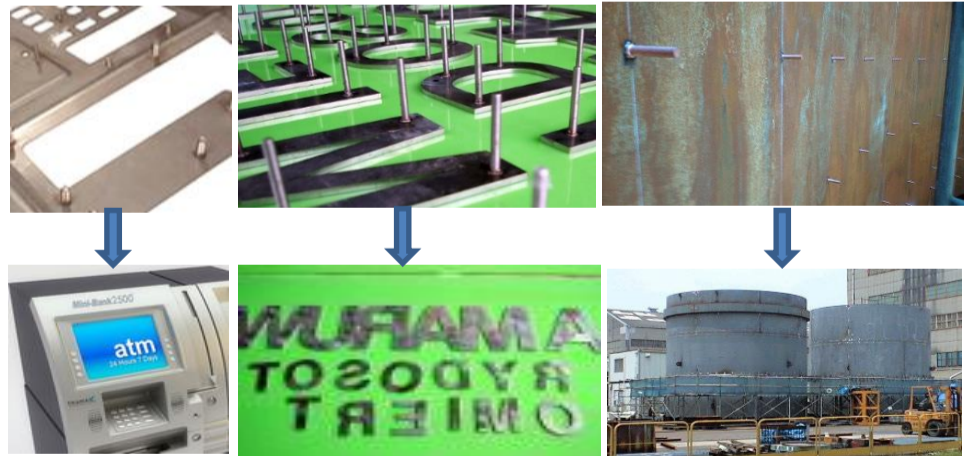

A sales agent that can not only sell welding machines, CD stud bolts and consumables, also carry out maintenance and repair simultaneously; a sales agent that has distribution routes to the precision sheet metal industry, sheet metal processing industry, etc.

7. STUFF CO., LTD

looking for
BUYER/SUPPLIER/PARTNERSHIP

1. Line of Business / Production Items

"KITOKI"

Carpentry vital sensing breathing device
(under development/reference exhibition)

"TISPY"

Learning-type IoT alcohol checker
(self-developed product)

Design of mechanism & housing
(trial manufacture)

Circuit design and board design
(trial manufacture)

We support large manufacturers in developing their projects from design, trial manufacture, to mass production through our integrated system; many projects have been realized by our designing electricity, software, mechanism, also by our processing and manufacturing in cooperation with our own plants and local subcontract plants.

We are taking more actions to enhance competitiveness by expanding partner networks, to satisfy requirements of cost, quality and speed which will furthermore be intensified in the future, and to produce many more products in the world!

- Main Products:** (1) Carpentry vital sensing breathing device "KITOKI" (under development/reference exhibition) Trial session is scheduled!
 (2) Self-developed product: Learning-type IoT alcohol gadget "TISPY"
 (3) Design and development: Design of circuits, circuit boards, and mechanisms, and software development
 (4) Prototyping: prototype mold production and forming, resin and metal cutting, shape forming with 3D printers, and circuit board manufacturing and mounting

Main Technology: Design and development, prototype, mass production

Main Customer (Industry): Electrical equipment, automobile, medical, industrial, equipment, IT, etc

2. We are looking for...

BUYER

- (1) Self-developed products
 - a) Carpentry vital sensing breathing device "kitoki" (under development and reference exhibition)
 - b) Learning-type IoT alcohol gadget "TISPY"
- (2) Various design operations including circuit, substrate, mechanism, and software development

【Target】

- (1) Buyers interested in health-related products
- (2) Companies having their local subsidiaries (automobile components, medical care, household appliance industry, etc.)

SUPPLIER

Companies that can take measures for mass production (from manufacture, assembly, to packing with small lot mass production included)

- (1) Metal processing (die cast, sheet metal, cutting, etc.)
- (2) Resin and rubber processing (from mass-production die manufacturing to molding and cutting, etc.)
- (3) Manufacture of substrate, mounting, assembly, and packing

【Target】

Manufacturers that have trading results with Japanese companies (home electronics, automobile, medical care, industrial machinery, etc.),
 *Manufacturers that can take measures for small lot production are welcomed in particular.

PARTNERSHIP

- (1) Manufacturers that can take measures for mass production of our products (mass production, assembly, and packing)
- (2) Expansion of distribution routes of our own products

【Target】

- (1) Manufacturers whose strong point is small to medium lot production and that can also take measures for mass production
- (2) Companies that can sell our products within Vietnam

●**Press processing machine**
The number of owned machines of 25 to 250 tons is 25 in total; all press machines were purchased from Japanese manufacturers.

●**Bright quenching & tempering furnace**
A mesh belt type continuous quenching furnace has been introduced.

●**Multi-forming machine**
These cams and tools enable to realize complicated shapes, which are too difficult to process by other processing machines.

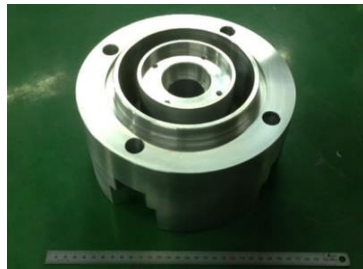

●**Mold die equipment**
Measures for die design/manufacture can be taken.

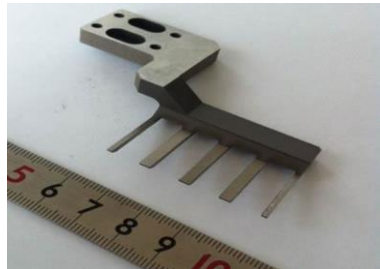

9. HANNAKOGYO CO., LTD.

looking for
BUYER/SUPPLIER

1. Line of Business / Production Items

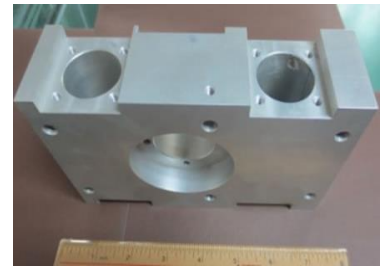

Jig parts for equipment

Conveyor parts

Cam-shaped pins

Pneumatic equipment parts

We offer Japanese quality at reduced costs from our plants in China, where we achieve the quality control same as that in Japan.

We promise that parts are smoothly procured, by undertaking all concerns and problems related to quality and due dates.

Requests for not only mass production but also single part processing are welcomed!!

Main Products: Metal-processing parts and precisely machined parts

- (1) Jigs and components required to be accurate to a tolerance of approximately 0.01 mm, used for automobile production lines and semiconductor production equipment
- (2) Components used for press punches
- (3) Components thoroughly controlled by our company, from heat treatment to odd-form processing, surface treatment, and quality control (dimensional and hardness inspection)

Main Technology:

- (1) We are capable of processing components under one roof, enabling to supply a wide variety of surface-treated metal, plastic, and special metal components.
- (2) Pre-delivery inspections are performed on all products by our quality control division, so we can deliver overwhelmingly fewer defective products than our industry peers.
- (3) We accept orders for one drawing or product. Overseas delivery (to customers other than those in Japan, and also to construction sites) is available.

Main Customer (Industry): FA equipment, air pressure and oil pressure, semiconductor equipment, food machines, other electrical machines, machine manufacturers, etc.

2. We are looking for...

BUYER

Metal-processing parts and precisely machined parts

【Target】 Manufacturing-facility manufacturers and FA-related companies

SUPPLIER

Machining parts, precision machining parts, sheet metal parts, and rubber parts

【Target】 Companies that perform metal machining on their own, especially those with expertise in single item processing or those that can deal with heat-treatment and surface treatment at the same time

3. Company Profile & Contact Information

THE REPRESENTATIVE OFFICE OF KOTOBUKI KANKYOH KIZAI CO., LTD
IN HANOI CITY **VN**

looking for
BUYER/SUPPLIER/PARTNERSHIP

1. Line of Business / Production Items

Drainage treatment equipment

Water treatment equipment

Washing equipment

Recycling equipment

We make active use of a large stock of knowledge and experience gained for 40 years and are engaged in manufacturing high-quality products specialized for water/wastewater treatment.

Main Products: Environmental engineering with a focus on water treatment

Main Technology: Water treatment, Wastewater treatment, floating oil collection device, active sludge, oil adsorption mat, etc.

Main Customer (Industry): General manufacturing industry, including food processing wastewater treatment plant, steel making, chemistry, electronic wastewater treatment plant, etc.

2. We are looking for...

BUYER

Water environment solution (wastewater treatment equipment, water treatment equipment, washing equipment, and recycling equipment)

【Target】 Companies that consider cost reduction, manpower saving, etc., about water/waste water treatment

SUPPLIER

Environment related product for water treatment (pump, blower, measuring instruments, etc.), and can manufacturing product for water treatment equipment

【Target】 (1) Companies that can provide water and environment related devices

(2) Companies that can manufacture our designed products and perform construction work of them

PARTNERSHIP

Local water treatment engineering company, and companies that manufacture our designed products and perform the construction of them

【Target】 We are looking for companies with which we cooperate for the business related to our designed products (fabrication and manufacture) in the field of water/waste water treatment.
